

PRESS RELEASE

Sinomem's subsidiaries awarded ISO 14001 certification

Singapore, 5 October 2004: - Sinomem Technology Limited ("Sinomem"), a leading membrane-based process specialist is proud to announce that its subsidiaries, Suntar Membrane Technology (Xiamen) Co. Ltd and Suntar Process Technology (Xiamen) Co. Ltd., have been awarded the prestigious ISO 14001:1996 certification for their environment management systems. The certification, which was verified by an independent third party, was awarded in recognition of the companies' strict compliance to environmental legislations and regulations, and its commitment to preservation of natural resources, pollution prevention and continuous improvement of its systems and processes to reduce environmental impact.

Developed by the International Standards Organization in 1996, the ISO 14001 standard helps companies to identify, prioritize and manage environmental risks as part of their normal business and manufacturing practices.

Dr Lan Wei Guang, founder and Managing Director, said, "The ISO 14001 certification is a validation of Sinomem's proactive attitude as a responsible corporate steward of the environment. With a structured Environmental Management System (EMS), we can better manage environmental issues as well as improve productivity and operational efficiency, and reduce costs. The ISO 14001 certification is also critical to Sinomem's long-term success as we position ourselves to our customers as the strategic business partner of choice for the development of cleaner production processes."

Added Dr Lan, "We are very proud of this achievement as it not only acknowledges our fulfillment of rigorous international standards but it also

demonstrates the quality of our business and of the people who work at Sinomem, who care about providing only the very best to our customers and business partners.”

Sinomem had also received ISO-9001: 2000 certification for quality management in 2002, underscoring its commitment to high quality standards for its systems and processes and customer satisfaction.
